

## Push Broom Fibers

**Black = Smooth Surface**

**Best for very smooth surfaces including treated plant and warehouse floors. For lighter, fine debris and dust.**

- Soft polymer stapled fibers.
- Flagging allows broom to pick up more fine dirt and dust.
- Fibers made of recycled PET polymers.

**Red = Multi-Surface**

**For all surface types except very rough outdoor surfaces. Can be used in wet and dry environments and resistant to most non-acidic chemicals**

- Combination of firm and flexible split tip polymer stapled fibers.
- Picks up fine dust and large debris.
- Fibers made of recycled PET polymers.

**Grey = Rough Surface**

**Best for wet/dry outdoor dock and lot clean-up. Works best on imperfect and pitted asphalt and concrete.**

- Stiff polymer stapled fibers.
- No flagging allows broom to withstand heavier debris and surfaces.
- Fibers made of recycled PET polymers.
