# Choose Your Mophead by Mop Material and End Type

**GREAT ON ALL THESE SURFACES AND MORE!**

Smooth Concrete

Stone

Ceramic Tile

Marble

Vinyl & Linoleum

## Mop Material

### Cotton

- Highly effective for general floor cleaning.
- Highly absorbent/floors dry faster.
- Economical.
- Break-in period required to remove oils.

### Premium Blend

- More durable than 100% cotton.
- Highly effective for general floor cleaning.
- Cotton fibers provide high water absorption.
- Polyester fibers provide additional strength, reduce linting/fraying, and reduce break-in period.

### Antibacterial

- Antibacterial properties inhibit growth of odor-causing bacteria.
- High-performing blend of cotton and synthetic fibers for absorbency and durability.

## End Type

### Looped-End

- Reduces fraying, linting, and unraveling.
- Increased durability and lifetime.
- Machine washable.

### Microfiber Tube Style

- Most durable, stands up to abrasive scrubbing and cleaning.
- Incredibly absorbent/ideal for picking up larger debris.
- For wet and dry cleaning.
- Floors dry faster for a lint-free shine.

### Microfiber Yarn Style

- Highly durable, non-abrasive for general floor cleaning.
- Attracts dust particles, removing up to 75% more dust than cotton mops.
- For wet and dry cleaning.

### Rayon Blend

- Great for applying floor finishes and disinfectants.
- Mildew and mold resistant.
- Effective for general-purpose mopping.

### Cut-End

- Economical for general cleaning.
- Ends may fray or unravel
- Disposable or hand wash.
